SUMMARY

AI Automation Engineer with 3+ years of experience designing and deploying practical automation systems — from OCR pipelines and AI agents to reporting dashboards and WhatsApp/Telegram bots. Combines Python, n8n, machine learning, and API integration to replace repetitive manual work with scalable, measurably efficient systems for small and medium businesses.

EXPERIENCE

Freelance AI & Data Automation Engineer

Jan 2025 – Present

- Designed and deployed 12+ AI automation pipelines (Python + n8n) for small businesses, reducing manual data processing by 60% across 5 client engagements
- Built an OCR + AI invoice processing system extracting 95%+ of document fields in real time, cutting manual data entry workload by ~80%
- Developed a football player monitoring AI agent with Telegram bot integration, serving 100+ players with weekly automated evaluations, tagging, and performance reports
- Created SQL + Tableau dashboards transforming 4-hour manual reporting into automated visual reports generated in under 5 minutes
- Delivered end-to-end ML projects across classification, clustering, content-based recommendation, and model deployment via REST APIs
- Clients include US, EU, and SEA companies across logistics, sports, and e-commerce verticals

Freelance 3D & Digital Fashion Designer

Sep 2022 – Dec 2024

- Delivered 50+ 3D design assets for international clients using Blender and CLO3D, achieving 95% client satisfaction rate
- Streamlined modelling-to-rendering workflow reducing average delivery time by 30% through reusable asset libraries

EDUCATION

Business Administration — Universitas Sahid Surakarta (Bachelor)

2016 – 2023 | GPA: 3.40 / 4.00

Rekayasa Perangkat Lunak (RPL) — SMK Negeri 5 Surakarta

2012 – 2015

SKILLS

Languages & Tools: Python, SQL, JavaScript, HTML/CSS, Bash

Automation & AI: n8n, LangChain, OCR, Machine Learning (scikit-learn, TensorFlow), AI Agents, Telegram Bot API

Data & BI: Tableau, Data Analysis, Data Preprocessing, ETL Pipelines

Design: Blender 3D, CLO3D, Figma

DevOps & Deployment: Docker, Linux, Nginx, REST API, Git, VPS
